Discover the Bright Horizons® Kindergarten Difference

At Bright Horizons, we recognize that children will soon be entering schools that have a range of expectations for social and academic performance. Our *World at Their Fingertips*® kindergarten curriculum is designed to engage children in active learning that builds the foundation for success in school while helping them to achieve their individual potential. The result is well-rounded, confident children who possess the ability to solve problems, make decisions, and engage with others.

Additionally, each Bright Horizons center works in concert with local schools to develop expectations and practices that ensure children's skills are in synch with the schools they will be attending. Using this integrated approach, children are ready to move to the elementary years socially prepared, excited to learn, and well-versed in the language, math, and science skills they'll need to succeed.

Kindergarten Program Highlights

- Low teacher to child ratio
- *Handwriting Without Tears*® program
- Rich curriculum approach that extends to include lifelong learning habits surrounding citizenship and social responsibility.
- 21st century technology in the classroom
- *Everyday Mathematics*® program
- Learning centers that allow for self-directed investigations as well as small group work and teacher-directed assignments and activities
