

Bright Horizons at Wheaton Unique Outdoor Learning Space

THE BEACH

This unique area of our natural playground has been custom designed to allow children feel wet sand squish between their toes, run water down the rivulet and watch it collect in a little pool, or sift dry sand through their fingers. Watch for the beach umbrellas in the summertime!

ADVENTURELAND

We all need to learn to cooperate with each other and use our imaginations if we are going to become good problem solvers. Adventureland combines the fun of dramatic play using a real canoe and camping materials and learning social skills of sharing and collaborative decision- making!

THE SHED

Everyone needs a place to be messy and creative! This outdoor creative space is home to woodworking materials, art supplies, and gardening tools. Your child will learn how to measure, use tools safely, create a garden or art piece while getting fresh air!

THE CORRAL

Children develop coordination and strength outside too! The corral, tunnel, and climbing structures all invite climbing, crawling, and riding.
