

Bright Horizons at Wellesley

Summer Adventures

At Bright Horizons we aim to take advantage of everything summer has to offer. Our teachers have specifically designed programs for preschool and Kindergarten Prep children that incorporate our surrounding community and special visitors as an extension of our classrooms and curriculum.

A sample of our Summer Adventures themes includes:

Space

- We will be kicking off the summer with a Space theme doing various activities such as Gravity painting, making telescopes.

Celebrating the USA

- A perfect way to celebrate USA's independence is by making a flag of United States, firework painting using marbles, USA bracelets.

Health/Sports

- During this segment we will set up an obstacle courses, bean bag Olympics and have enrichment providers like Amazing Athletes and Yoga visit us.

Ocean

- Children will enjoy a visit from the Aquarium and follow up with activities related to the ocean such as making aquarium bags, seashell exploration, building boats, incorporate some science with sink and float activities.

STEM

- We will be building Gum Drop structures, exploring volume and have a visit from Steve the Science Guy

Camping

- Oh camping we shall go... building a campfire, campfire stories, and marshmallow painting, enjoy a picnic and have some s'mores...

We invite you to contact us to learn about enrollment opportunities for your family!
