

# GardenWorks

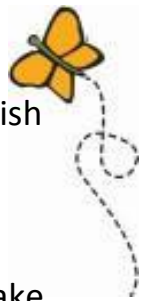

## Annual Family Event

Gardening is an incredibly rich source of learning for children of all ages. *GardenWorks* stems from several areas of the *World at Their Fingertips* curriculum:

*Science Rocks*- Children learn about the life cycle of different plants, what a plant needs to grow, and the different parts of a plant, how to make hypotheses and how to record results.

*Well Aware*- Children learn to sample new foods and how healthy foods nourish the body.

*Toward a Better World*- Gardening teaches children to work together to accomplish a common goal and how to care for the environment and help make the world a sustainable place.
